

UNIT : 1

1. What is Research Methodology?

Answer: Systematic process

2. What is the significance of Research Methodology?

Answer: Ensures validity

3. What are the objectives of Research?

Answer: To find answers

4. What is the primary objective of Research?

Answer: To solve problems

5. What are the two main types of Research?

Answer: Quantitative and Qualitative

6. What is Quantitative Research?

Answer: Numerical data

7. What is Qualitative Research?

Answer: Non-numerical data

8. What are the steps in Research?

Answer: Formulation, design, collection, analysis

9. What is the first step in Research?

Answer: Formulation

10. What is the purpose of Literature Review?

Answer: To gain insight

11. What is a Research Problem?

Answer: Gap in knowledge

12. How is a Research Problem identified?

Answer: Through observation

13. What is the importance of selecting a Research Problem?

Answer: Ensures relevance

14. What are the criteria for selecting a Research Problem?

Answer: Significance, feasibility

15. What is the purpose of Formulating a Research Problem?

Answer: To clarify objectives

16. What is a Research Question?

Answer: Specific query

17. What is a Research Hypothesis?

Answer: Testable statement

18. What is the difference between a Research Question and Hypothesis?

Answer: Question is open-ended, Hypothesis is testable

19. What is the purpose of a Literature Review?

Answer: To gain insight

20. What are the types of Research Designs?

Answer: Experimental, quasi-experimental

21. What is an Experimental Research Design?

Answer: Manipulation of variables

22. What is a Quasi-Experimental Research Design?

Answer: Non-random assignment

23. What is a Survey Research Design?

Answer: Self-report measures

24. What is an Observational Research Design?

Answer: Non-participant observation

25. What are the types of Sampling Methods?

Answer: Probability, non-probability

26. What is Probability Sampling?

Answer: Random selection

27. What is Non-Probability Sampling?

Answer: Non-random selection

28. What is a Pilot Study?

Answer: Small-scale trial

29. What is the purpose of a Pilot Study?

Answer: To test feasibility

30. What are the types of Data Collection Methods?

Answer: Primary, secondary

31. What is Primary Data Collection?

Answer: Original data

32. What is Secondary Data Collection?

Answer: Existing data

33. What are the types of Data Analysis Methods?

Answer: Qualitative, quantitative

34. What is Qualitative Data Analysis?

Answer: Non-numerical data

35. What is Quantitative Data Analysis?

Answer: Numerical data

36. What is a Research Report?

Answer: Documented findings

37. What is the purpose of a Research Report?

Answer: To communicate findings

38. What are the components of a Research Report?

Answer: Introduction, literature review

39. What is the importance of citing sources in a Research Report?

Answer: Avoids plagiarism

40. What is the purpose of a Reference List?

Answer: To acknowledge sources

41. What is the difference between a Research Report and a Research Paper?

Answer: Report is documented findings, Paper is scholarly article

42. What is the purpose of a Research Proposal?

Answer: To outline research plan

43. What are the components of a Research Proposal?

Answer: Introduction, literature review, methodology

44. What is the importance of a Research Proposal?

Answer: Ensures clarity

45. What is the difference between a Research Proposal and a Research Report?

Answer: Proposal outlines plan, Report documents findings

46. What is a Research Problem Statement?

Answer: Clear description

47. What is the purpose of a Research Problem Statement?

Answer: To clarify objectives

48. What are the characteristics of a good Research Problem Statement?

Answer: Specific, measurable

49. What is the importance of a Research Problem Statement?

Answer: Ensures focus

50. What is the difference between a Research Problem Statement and a Research Question?

Answer: Problem statement is broad, Question is specific

UNIT : 2

51. What is Problem Definition?

Answer: Clear description

52. What is the purpose of Problem Definition?

Answer: To clarify objectives

53. What are the characteristics of a good Problem Definition?

Answer: Specific, measurable

54. What is Research Design?

Answer: Plan for research

55. What are the types of Research Design?

Answer: Experimental, quasi-experimental

56. What is Research Plan Preparation?

Answer: Detailed plan

57. What are the components of a Research Plan?

Answer: Introduction, literature review, methodology

58. What is Hypothesis?

Answer: Testable statement

59. What is Review of Literature?

Answer: Critical evaluation

60. What is the purpose of Review of Literature?

Answer: To gain insight

61. How can the internet be used as a source in identifying gap areas from literature reviews?

Answer: Online databases

62. What are emerging trends in research?

Answer: Artificial intelligence

63. What is the role of computers in Research?

Answer: Data analysis

64. What are Sampling Techniques?

Answer: Methods for selecting participants

65. What are the types of Sampling?

Answer: Probability, non-probability

66. What are the steps in Sampling?

Answer: Definition, selection, recruitment

67. What is Sample Size?

Answer: Number of participants

68. What are the advantages of Sampling?

Answer: Cost-effective, time-efficient

69. What are the limitations of Sampling?

Answer: Bias, error

70. What is Data for Research?

Answer: Information collected

71. What are the types of Data for Research?

Answer: Primary, secondary

72. What are the methods for collecting Primary Data?

Answer: Observation, interview, questionnaire

73. What is Observation in research?

Answer: Watching behavior

74. What is Interview in research?

Answer: Verbal conversation

75. What is Questionnaire in research?

Answer: Self-report measure

76. What is Experimental Study in research?

Answer: Manipulation of variables

77. What is Case Study in research?

Answer: In-depth analysis

78. What is Secondary Data in research?

Answer: Existing information

79. What are the advantages of Secondary Data?

Answer: Cost-effective, time-efficient

80. What are the limitations of Secondary Data?

Answer: Bias, error

81. What is Processing Data in research?

Answer: Organizing information

82. What are the steps in Processing Data?

Answer: Checking, editing, coding

83. What is Checking in data processing?

Answer: Verifying accuracy

84. What is Editing in data processing?

Answer: Correcting errors

85. What is Coding in data processing?

Answer: Assigning numbers

86. What is Transcription in data processing?

Answer: Converting data

87. What is Tabulation in data processing?

Answer: Organizing data

88. What is the purpose of Data Processing?

Answer: To prepare data

89. What are the benefits of Data Processing?

Answer: Improved accuracy

90. What are the challenges of Data Processing?

Answer: Data quality issues

91. How can data quality issues be addressed?

Answer: Data cleaning

92. What is Data Cleaning?

Answer: Removing errors

93. What are the steps in Data Cleaning?

Answer: Checking, editing, coding

94. What is the importance of Data Cleaning?

Answer: Improved accuracy

95. What are the benefits of using computers in research?

Answer: Improved efficiency

96. What are the challenges of using computers in research?

Answer: Technical issues

97. How can technical issues be addressed?

Answer: Troubleshooting

98. What is Troubleshooting?

Answer: Identifying solutions

99. What are the steps in Troubleshooting?

Answer: Identifying problem, analyzing data

100. What is the importance of Troubleshooting?

Answer: Improved efficiency

101. What are the types of Research Design?

Answer: Experimental, quasi-experimental

102. What is Experimental Research Design?

Answer: Manipulation of variables

103. What is Quasi-Experimental Research Design?

Answer: Non-random assignment

104. What is the purpose of Research Design?

Answer: To plan research

105. What are the benefits of Research Design?

Answer: Improved validity

106. What are the challenges of Research Design?

Answer: Methodological issues

107. How can methodological issues be addressed?

Answer: Pilot study

108. What is a Pilot Study?

Answer: Small-scale trial

109. What is the purpose of a Pilot Study?

Answer: To test feasibility

110. What are the benefits of a Pilot Study?

Answer: Improved validity

111. What is Problem Definition?

Answer: Clear description

112. What is the purpose of Problem Definition?

Answer: To clarify objectives

113. What is Research Design?

Answer: Plan for research

114. What are the types of Research Design?

Answer: Experimental, quasi-experimental

115. What is Research Plan Preparation?

Answer: Detailed plan

116. What is Hypothesis?

Answer: Testable statement

117. What is Review of Literature?

Answer: Critical evaluation

118. What is the purpose of Review of Literature?

Answer: To gain insight

119. How can the internet be used as a source in identifying gap areas from literature reviews?

Answer: Online databases

120. What are emerging trends in research?

Answer: Artificial intelligence

121. What is the role of computers in Research?

Answer: Data analysis

122. What are Sampling Techniques?

Answer: Methods for selecting participants

123. What are the types of Sampling?

Answer: Probability, non-probability

124. What are the steps in Sampling?

Answer: Definition, selection, recruitment

125. What is Sample Size?

Answer: Number of participants

126. What are the advantages of Sampling?

Answer: Cost-effective, time-efficient

127. What are the limitations of Sampling?

Answer: Bias, error

128. What is Probability Sampling?

Answer: Random selection

129. What is Non-Probability Sampling?

Answer: Non-random selection

130. What is Stratified Sampling?

Answer: Dividing population

131. What is Systematic Sampling?

Answer: Selecting at intervals

132. What is Convenience Sampling?

Answer: Selecting easily accessible

133. What is Purposive Sampling?

Answer: Selecting based on purpose

134. What is Quota Sampling?

Answer: Selecting based on quota

135. What is Snowball Sampling?

Answer: Selecting through referrals

136. What are the advantages of Probability Sampling?

Answer: Representative sample

137. What are the limitations of Probability Sampling?

Answer: Time-consuming, expensive

138. What are the advantages of Non-Probability Sampling?

Answer: Time-efficient, cost-effective

139. What are the limitations of Non-Probability Sampling?

Answer: Bias, error

140. What is the purpose of Sampling?

Answer: To select participants

141. What is the importance of Sample Size?

Answer: Representative sample

142. What are the factors affecting Sample Size?

Answer: Population size, sampling error

143. What is the difference between Sampling and Census?

Answer: Sampling is a subset, Census is the entire population

144. What are the types of errors in Sampling?

Answer: Sampling error, non-sampling error

145. What is Sampling error?

Answer: Error due to random sampling

146. What is Non-sampling error?

Answer: Error due to non-random factors

147. How can Sampling errors be reduced?

Answer: Increasing sample size

148. How can Non-sampling errors be reduced?

Answer: Improving data collection methods

149. What is the role of computers in Sampling?

Answer: Random selection, data analysis

150. What are the advantages of using computers in Sampling?

Answer: Improved efficiency, accuracy

151. What are the limitations of using computers in Sampling?

Answer: Technical issues, dependence on technology

152. How can technical issues be addressed?

Answer: Troubleshooting, technical support

153. What is the importance of Sampling in Research?

Answer: Representative sample, generalizability

154. What are the ethical considerations in Sampling?

Answer: Informed consent, confidentiality

155. How can ethical considerations be addressed?

Answer: Institutional review board approval

156. What is the difference between Sampling and Data Collection?

Answer: Sampling is selecting participants, Data Collection is gathering information

157. What are the types of Data Collection methods?

Answer: Primary, secondary

158. What is Primary Data Collection?

Answer: Original data

159. What is Secondary Data Collection?

Answer: Existing data

160. What are the advantages of Primary Data Collection?

Answer: Original, up-to-date information

161. What is Primary Data?

Answer: Original data

162. What are the methods of Primary Data Collection?

Answer: Observation, interview, questionnaire

163. What is Observation in research?

Answer: Watching behavior

164. What is Interview in research?

Answer: Verbal conversation

165. What is Questionnaire in research?

Answer: Self-report measure

166. What is Experimental Study in research?

Answer: Manipulation of variables

167. What is Case Study in research?

Answer: In-depth analysis

168. What is Secondary Data?

Answer: Existing information

169. What is the relevance of Secondary Data?

Answer: Cost-effective, time-efficient

170. What are the limitations of Secondary Data?

Answer: Bias, error

171. What are the cautions when using Secondary Data?

Answer: Evaluate source, consider bias

172. What is Processing Data in research?

Answer: Organizing information

173. What are the steps in Processing Data?

Answer: Checking, editing, coding

174. What is Checking in data processing?

Answer: Verifying accuracy

175. What is Editing in data processing?

Answer: Correcting errors

176. What is Coding in data processing?

Answer: Assigning numbers

177. What is Transcription in data processing?

Answer: Converting data

178. What is Tabulation in data processing?

Answer: Organizing data

179. What is the purpose of Data Processing?

Answer: To prepare data

180. What are the benefits of Data Processing?

Answer: Improved accuracy

181. What are the challenges of Data Processing?

Answer: Data quality issues

182. How can data quality issues be addressed?

Answer: Data cleaning

183. What is Data Cleaning?

Answer: Removing errors

184. What are the steps in Data Cleaning?

Answer: Checking, editing, coding

185. What is the importance of Data Cleaning?

Answer: Improved accuracy

186. What are the types of errors in Data Processing?

Answer: Syntax error, logical error

187. What is Syntax Error in Data Processing?

Answer: Error in code

188. What is Logical Error in Data Processing?

Answer: Error in reasoning

189. How can errors in Data Processing be reduced?

Answer: Data validation

190. What is Data Validation in Data Processing?

Answer: Checking data accuracy

191. What are the benefits of Data Validation?

Answer: Improved data quality

192. What are the challenges of Data Validation?

Answer: Data complexity

193. How can data complexity issues be addressed?

Answer: Data simplification

194. What is Data Simplification in Data Processing?

Answer: Reducing data complexity

195. What are the benefits of Data Simplification?

Answer: Improved data quality

196. What are the challenges of Data Simplification?

Answer: Data loss

197. How can data loss issues be addressed?

Answer: Data backup

198. What is Data Backup in Data Processing?

Answer: Saving data copies

199. What are the benefits of Data Backup?

Answer: Data recovery

200. What are the challenges of Data Backup?

Answer: Storage space

201. How can storage space issues be addressed?

Answer: Data compression

201. What is Data Compression in Data Processing?

Answer: Reducing data size

202. What are the benefits of Data Compression?

Answer: Improved storage efficiency

203. What are the challenges of Data Compression?

Answer: Data loss

204. How can data loss issues be addressed?

Answer: Data decompression

205. What is Data Decompression in Data Processing?

Answer: Restoring data size

206. What are the benefits of Data Decompression?

Answer: Improved data quality

206. What are the challenges of Data Decompression?

Answer: Time-consuming

207. How can time-consuming issues be addressed?

Answer: Automation

208. What is Automation in Data Processing?

Answer: Using software

209. What are the benefits of Automation?

Answer: Improved efficiency

210. What are the challenges of Automation?

Answer: Technical issues

211. How can technical issues be addressed?

Answer: Technical support

212. What is Technical Support in Data Processing?

Answer: Assistance with technical issues

213. What are the benefits of Technical Support?

Answer: Improved efficiency

214. What are the challenges of Technical Support?

Answer: Cost

215. How can cost issues be addressed?

Answer: Budgeting

216. What is Budgeting in Data Processing?

Answer: Allocating resources

217. What are the benefits of Budgeting?

Answer: Improved cost-effectiveness

218. What are the challenges of Budgeting?

Answer: Limited resources

219. How can limited resources issues be addressed?

Answer: Resource

UNIT : 4

220. What is a Report?

Answer: Document

221. What are the Types of Reports?

Answer: Formal

222. What is a Formal Report?

Answer: Structured

223. What is an Informal Report?

Answer: Unstructured

224. What is the purpose of a Report?

Answer: Communication

225. What are the Styles of Reporting?

Answer: Narrative

226. What is Narrative Reporting?

Answer: Storytelling

227. What is Analytical Reporting?

Answer: Breakdown

228. What are the Steps in Drafting Reports?

Answer: Planning

229. What is the purpose of Editing?

Answer: Correction

230. What is the purpose of Evaluating?

Answer: Assessment

231. What is a Proposal?

Answer: Plan

232. What is the purpose of a Proposal?

Answer: Funding

233. What is a Research Team?

Answer: Collaboration

234. What is the purpose of a Research Team?

Answer: Support

235. What is Critical Appraisal?

Answer: Evaluation

236. What is the purpose of Critical Appraisal?

Answer: Assessment

237. What are the Guidelines for Appraisal of Published Research?

Answer: Criteria

238. What is the purpose of Guidelines for Appraisal?

Answer: Standardization

239. What is Published Research?

Answer: Journal

240. What is the purpose of Published Research?

Answer: Dissemination

241. What is Research Evaluation?

Answer: Assessment

242. What is the purpose of Research Evaluation?

Answer: Improvement

243. What is Research Quality?

Answer: Excellence

244. What is the purpose of Research Quality?

Answer: Credibility

245. What is Research Validity?

Answer: Accuracy

246. What is the purpose of Research Validity?

Answer: Reliability

247. What is Research Reliability?

Answer: Consistency

248. What is the purpose of Research Reliability?

Answer: Generalizability

249. What is Research Generalizability?

Answer: Applicability

250. What is the purpose of Research Generalizability?

Answer: Utility

251. What is Research Utility?

Answer: Usefulness

252. What is the purpose of Research Utility?

Answer: Impact

253. What is Research Impact?

Answer: Influence

254. What is the purpose of Research Impact?

Answer: Change

255. What is Research Ethics?

Answer: Principles

256. What is the purpose of Research Ethics?

Answer: Guidance

257. What is Research Integrity?

Answer: Honesty

258. What is the purpose of Research Integrity?

Answer: Trust

259. What is Research Transparency?

Answer: Openness

260. What is the purpose of Research Transparency?

Answer: Accountability

261. What is Research Accountability?

Answer: Responsibility

262. What is the purpose of Research Accountability?

Answer: Answerability

263. What is Research Answerability?

Answer: Explanation

264. What is the purpose of Research Answerability?

Answer: Justification

265. What is Research Justification?

Answer: Reasoning

266. What is the purpose of Research Justification?

Answer: Legitimization

267. What is Research Legitimization?

Answer: Validation

268. What is the purpose of Research Legitimization?

Answer: Recognition

269. What is Research Recognition?

Answer: Acknowledgement

270. What is the first step in preparing a report?

Answer: Planning

271. What is the purpose of a Report Layout?

Answer: Organization

272. What is the typical Structure of a Report?

Answer: Introduction

273. What is the purpose of Language in a Report?

Answer: Clarity

274. What are Illustrations in a Report?

Answer: Figures

275. What are Tables in a Report?

Answer: Data

276. What is a Bibliography in a Report?

Answer: References

277. What is Referencing in a Report?

Answer: Citation

278. What are Footnotes in a Report?

Answer: Explanations

278. What is an Oral Presentation?

Answer: Speech

279. What is the purpose of Planning in Oral Presentation?

Answer: Organization

280. What is the purpose of Preparation in Oral Presentation?

Answer: Rehearsal

281. What is the purpose of Practice in Oral Presentation?

Answer: Improvement

282. What is the purpose of Making a Presentation?

Answer: Communication

283. What are Visual Aids in Oral Presentation?

Answer: Slides

284. What is the Importance of Effective Communication?

Answer: Clarity

285. What is the purpose of a Report?

Answer: Information

286. What are the types of Reports?

Answer: Formal

287. What is a Formal Report?

Answer: Structured

288. What is an Informal Report?

Answer: Unstructured

289. What is the purpose of a Report Layout?

Answer: Organization

290. What is the typical Structure of a Report?

Answer: Introduction

291. What is the purpose of Language in a Report?

Answer: Clarity

292. What are the characteristics of a good Report?

Answer: Accuracy

293. What is the purpose of Editing in Report Writing?

Answer: Correction

294. What is the purpose of Proofreading in Report Writing?

Answer: Verification

295. What is the purpose of a Report Bibliography?

Answer: References

296. What is the purpose of Referencing in a Report?

Answer: Citation

297. What are Footnotes in a Report?

Answer: Explanations

298. What is the purpose of an Oral Presentation?

Answer: Communication

299. What is the purpose of Visual Aids in Oral Presentation?

Answer: Illustration

300. What are the types of Visual Aids?

Answer: Slides

301. What is the purpose of Practice in Oral Presentation?

Answer: Improvement

302. What is the purpose of Feedback in Oral Presentation?

Answer: Evaluation

303. What is the importance of Effective Communication?

Answer: Clarity

304. What are the barriers to Effective Communication?

Answer: Noise

305. How can barriers to Effective Communication be overcome?

Answer: Feedback

306. What is the purpose of a Report Abstract?

Answer: Summary

307. What is the purpose of a Report Introduction?

Answer: Background

308. What is the purpose of a Report Conclusion?

Answer: Summary

309. What is the purpose of a Report Recommendation?

Answer: Suggestion

310. What is the purpose of a Report Appendix?

Answer: Supplement

311. What are the characteristics of a good Report Writer?

Answer: Clarity

312. What are the skills required for Report Writing?

Answer: Communication

313. What are the tools used for Report Writing?

Answer: Software

314. What is the purpose of a Report Template?

Answer: Guideline

315. What are the benefits of using a Report Template?

Answer: Consistency

316. What are the limitations of using a Report Template?

Answer: Inflexibility

317. How can Report Writing be improved?

Answer: Practice

318. What is the importance of Report Writing in Research?

Answer: Communication

UNIT : 5

319. What is Ethics in Research?

Answer: Morality

320. What are Ethical Issues in Research?

Answer: Confidentiality

321. What are Intellectual Property Rights?

Answer: Ownership

322. What is Copyright?

Answer: Protection

323. What is Royalty?

Answer: Payment

324. What are Patents?

Answer: Invention

325. What are Geographical Indications?

Answer: Origin

326. What is Reproduction of Published Material?

Answer: Copying

327. What is Citation?

Answer: Reference

328. What is Acknowledgement?

Answer: Gratitude

329. What is Reproducibility?

Answer: Duplication

330. What is Accountability?

Answer: Responsibility

331. What is Policy on Academic Honesty?

Answer: Integrity

332. What is Plagiarism?

Answer: Theft

333. What are Unscientific Practices?

Answer: Fraud

334. What is Ethics in Science?

Answer: Principles

335. What are Opportunities for Research Funding?

Answer: Grants

336. What is the purpose of Ethics in Research?

Answer: Guidance

337. What are the consequences of Unethical Research?

Answer: Penalty

338. What is the importance of Citation?

Answer: Credit

339. What is the purpose of Acknowledgement?

Answer: Appreciation

340. What is the role of Intellectual Property Rights?

Answer: Protection

341. What is the difference between Copyright and Patent?

Answer: Type

342. What is the purpose of Geographical Indications?

Answer: Identification

343. What is the importance of Reproducibility?

Answer: Verification

344. What is the role of Accountability?

Answer: Responsibility

345. What is the purpose of Policy on Academic Honesty?

Answer: Integrity

346. What are the consequences of Plagiarism?

Answer: Penalty

347. What is the importance of Ethics in Science?

Answer: Principles

348. What are the benefits of Research Funding?

Answer: Support

349. What is the role of Government Agencies in Research Funding?

Answer: Sponsorship

350. What is the purpose of Research Proposals?

Answer: Funding

351. What are the key elements of a Research Proposal?

Answer: Objectives

352. What is the importance of Budgeting in Research?

Answer: Planning

353. What are the consequences of Unscientific Practices?

Answer: Penalty

354. What is the role of Ethics Committees?

Answer: Oversight

355. What is the purpose of Informed Consent?

Answer: Protection

356. What are the benefits of Collaborative Research?

Answer: Partnership

357. What is the importance of Research Dissemination?

Answer: Sharing

358. What are the consequences of Research Misconduct?

Answer: Penalty

359. What is the role of Institutional Review Boards?

Answer: Oversight

360. What is the purpose of Research Ethics Training?

Answer: Education

361. What are the benefits of Research Ethics?

Answer: Integrity

362. What is the importance of Research Transparency?

Answer: Accountability

363. What are the consequences of Lack of Transparency?

Answer: Penalty

364. What is the role of Open Access Publishing?

Answer: Sharing

365. What is the purpose of Research Data Management?

Answer: Organization

366. What are the benefits of Research Collaboration?

Answer: Partnership

367. What is the importance of Research Communication?

Answer: Sharing

368. What are the consequences of Poor Research Communication?

Answer: Misunderstanding

369. What is Ethics in Research?

Answer: Morality

370. What are Ethical Issues in Research?

Answer: Confidentiality

371. What are Intellectual Property Rights?

Answer: Ownership

372. What is Copyright?

Answer: Protection

373. What is Royalty?

Answer: Payment

374. What are Patents?

Answer: Invention

375. What are Geographical Indications?

Answer: Origin

376. What is Reproduction of Published Material?

Answer: Copying

377. What is Citation?

Answer: Reference

378. What is Acknowledgement?

Answer: Gratitude

379. What is the purpose of Ethics in Research?

Answer: Guidance

380. What are the consequences of Unethical Research?

Answer: Penalty

381. What is the importance of Citation?

Answer: Credit

382. What is the purpose of Acknowledgement?

Answer: Appreciation

383. What is the role of Intellectual Property Rights?

Answer: Protection

384. What is the difference between Copyright and Patent?

Answer: Type

385. What is the purpose of Geographical Indications?

Answer: Identification

386. What is the importance of Reproduction of Published Material?

Answer: Authorization

387. What is the role of Citation in Research?

Answer: Verification

388. What is the purpose of Acknowledgement in Research?

Answer: Gratitude

389. What are the ethical issues in Intellectual Property Rights?

Answer: Piracy

390. What is the importance of Copyright in Research?

Answer: Protection
